

## INNOVATION AT DAY CARE CENTERS AND SCHOOLS THROUGH COOPERATION AND PARTICIPATION

YOUR CONTRIBUTION TO DEVELOPING EDUCATION IN GERMANY

Stiftung Bildung is evolving as an important community counseling and charity institution for education throughout Germany, especially for day care centers and school associations, in the coming years.

### STRENGTHENING PARTICIPATION – CHANCE EDUCATION

Kindergarten and school associations form the largest network of communal contribution to education. With your support and competence the Stiftung Bildung can skillfully represent the interests of the educational facilities with a strong voice.

### ENABLE EXCHANGE – SPREAD IDEAS – PROMOTE INNOVATION

Exchange and cooperation is made possible through the connections of a large mesh of voluntary work which is led by the coordination and professional work of the national association of daycare centers and school associations. The aim of the Stiftung Bildung is to ensure full-time positions and structures are established in unions throughout the German federal states. Requirements and necessities of individual day care centers and schools are made visible through this network which, furthermore, enables precise and individual support. The associations can thereby collect the different opinions and promote changes and improvements politically. New ideas and projects can become easily introduced to day care centers and schools through this network, owing to this, associations become an important medium for promoting innovation in the educational system.

### PARTICIPATION AS AN EDUCATIONAL GOAL AND A FOUNDATION IN A CHANGING DEMOCRACY

Political education often misses the necessities and interests of children and young adults, consequentially, Stiftung Bildung promotes their participation in all educational facilities. Your efforts help to increase the importance of joy in learning. The epicenter in the process of learning is formed by creativity and passion which, in turn, promotes a positive definition of the word exertion. Participation is a brick in the foundation of a changing democracy. Strong communities and a stable, enduring society are created by the efforts and achievements of children and young adults who are active and contributive at an early age.

### STIFTUNG BILDUNG: THE CHARITY ORGANIZATION FOR EDUCATION IN GERMANY

Stiftung Bildung is on its way to becoming the first nation-wide active charity institution for education. Every single individual can ensure, through their participation, that education is reinstated as a priority in Germany. Your motivation and effort contribute to Stiftung Bildung reaching this milestone. Your support is a safeguard to the welfare and improvement of the quality of education.
